

MARVIN NDUNG’U

Nairobi, Kenya | +254 790 323 044 | marvgichia8@gmail.com

EDUCATION

Murang’a University of Technology

Murang’a

Bachelor of Computer Science

2025

Relevant Coursework: Data Analysis, Software Engineering, Operating Systems, Web Development, Artificial Intelligence, Database Management

WORK EXPERIENCE

Betting Control & Licensing Board

Nairobi, Kenya

IT Intern

April 2024 – September 2024

- Supported technical team during office renovation by tracing and mapping 500+ ethernet cable runs throughout the facility
- Installed and configured 15+ wireless access points to provide comprehensive Wi-Fi coverage across renovated workspace
- Assisted in new server installation and configuration, ensuring 100% uptime during transition period
- Deployed and managed virtual machine workspaces for 40+ employees, optimizing resource allocation
- Migrated employee data and departmental groupings between virtual machines
- Performed software installations and configurations on 45+ workstations including employee desks and additional office spaces, reducing deployment time
- Distributed new office computers to 40+ employees and provided training on system operations
- Installed and configured 8+ network printers with proper driver deployment and connectivity setup
- Maintained and monitored 2 Cisco switches, ensuring optimal network performance and seamless operation

TECHNICAL SKILLS

Programming Languages: HTML, CSS, JavaScript, Python, C, C++

Data Analysis tools: STATA, SPSS

Cybersecurity: Basic understanding of cybersecurity principles including password management, network security fundamentals, malware identification, access control basics, data backup procedures, phishing awareness, and secure communication practices

Transferable skills: Problem-analysis: Applying systematic approaches to identify and solve issues, Teamwork: Clear communication and working collaboratively with others

UNIVERSITY PROJECTS

EMAIL AND PHISHING DETECTION SYSTEM

January 2025

- Developed an intelligent email and phishing detection system in Python to identify and filter malicious messages.
- Implemented advanced text analysis, pattern recognition, and classification techniques for enhanced security.
- Strengthened understanding of cybersecurity and Python-based machine learning models.

ONLINE QUIZ APPLICATION

September 2024

- Programmed a quiz application with Python, allowing users to take quizzes on various subjects.
- Implemented user authentication, quiz generation, and score tracking.
- Enhanced analytical abilities and improved proficiency in Python programming.

CERTIFICATIONS AND TRAINING

- Mindcluster Cybersecurity Intelligence Fundamentals Certificate (May 2023)
- Mindcluster Network Security Management Certificate (October 2023)
- Mindcluster Cryptography and Network Security Certificate (October 2023)

Cybershujaa Cybersecurity Training Program

(Ongoing, December 2025)

Focus: Network security, penetration testing, digital forensics, cloud security
